I can't understand why the City would propose a one-way street through a residential area. To have 2-90° turns within one city block on a one way street does not make sense at all. What is the plan for the City USA bldg? You can barely get around that corner on N. Shuman as it is now. If you plan on purchasing property—both commercial & residential—to make this happen, aren't you asking a lot of the taxpayers. How about purchasing the only 2 residences on W. Harriet St

What would be affected by this plan?

If your proposal of a one way street on W. Harriet & N. Shuman you're asking over 20 property owners to give up the right of even being able to back out of our driveways. What about the children walking to & from the schools & the children that live on these 2 streets.

I highly recommend an alternative plan. If you plan on purchasing property, do so on either the East or West side of the City. It's time to stop worrying about downtown business owners and think a little bit more seriously of residential property owners.

If businesses are short on parking stalls perhaps the City didn't do their job when they approved the businesses.

I am totally against purchasing property for parking lots. Business owner should follow Carl Miller's example: When he needed additional parking - he purchased property, he didn't expect taxpayers to do it for him.
